SAFETY DATA SHEET

1. Identification

1. Identification		
Product identifier	ORTHENE® 97, AMVAC	
Other means of identification		
SDS number	372	
Synonym(s)	Orthene® PCO Pellets * Orther	ne® 97 ST * Orthene® Turf, Tree & Ornamental 97 Spray
Recommended use	Organophosphate insecticide.	
Recommended restrictions	Keep out of the Reach of Child	ren!
EPA Registration number	EPA: 5481-8973; 5481-8978	
Manufacturer/Importer/Supplier/	Distributor information	
Manufacturer		
Company name	AMVAC Chemical Corporation	
Address	4100 E Washington Blvd	
Televis	Los Angeles, CA 90023 USA	000.004.0010
Telephone	AMVAC Chemical Corp AMVAC Chemical Corp	323-264-3910 323-268-1028 (FAX)
Website	www.Amvac-Chemical.com	
E-mail	CustServ@Amvac-Chemical.co	om
Emergency phone number	Medical	888-681-4261
	CHEMTREC® (USA+Canada)	
	Product Use CHEMTREC® (Outside USA)	888-462-6822 +1-703-527-3887
2. Hazard(s) identification		
Physical hazards	Not classified.	
Health hazards	Acute toxicity, oral	Category 4
Environmental hazards	Not classified.	
OSHA defined hazards	Not classified.	
Label elements		
	$\mathbf{\wedge}$	
	· · · /	
	V	
Signal word	Warning	
Hazard statement	Harmful if swallowed.	

Signal word	Warning
Hazard statement	Harmful if swallowed.
Precautionary statement	
Prevention	Wash thoroughly after handling. Do not eat, drink or smoke when using this product.
Response	If swallowed: Call a poison center/doctor if you feel unwell. Rinse mouth. IF exposed or concerned: Get medical advice/attention. Collect spillage.
Storage	Store away from incompatible materials.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Hazard(s) not otherwise classified (HNOC)	Toxic to aquatic life with long lasting effects.
Supplemental information	None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
Acephate (O,S-Dimethylacetylphosphora thioate)	mido	30560-19-1	97.4
Other compoounds			2.6
4. First-aid measures			
nhalation	Move to fresh air. Call a physician if symptom method if victim inhaled the substance. Induc equipped with a one-way valve or other prope	e artificial respiration with the	e aid of a pocket ma
Skin contact	Wash off with soap and water. Get medical a contaminated clothing and wash before reuse		and persists. Take of
Eye contact	Flush eyes immediately with large amounts o to do. Get medical attention if irritation develo		ses, if present and e
Ingestion	If victim is conscious, administer an 8 oz. glas Have person lie on their left side to slow down anything by mouth to a victim who is unconsc advice/attention if you feel unwell. Rinse mou content doesn't get into the lungs. Do not use substance. Induce artificial respiration with th valve or other proper respiratory medical dev	n absorption of the ingested cious or is having convulsions ith. If vomiting occurs, keep h mouth-to-mouth method if v e aid of a pocket mask equip	material. Never give c. Get medical lead low so that stor ictim ingested the
Most important symptoms/effects, acute and delayed	This product is a Cholinesterase Inhibitor. Pre aggravated by exposure to components of thi cholinesterase levels increase vulnerability to plasma) chronic alcoholism; malnutrition; der carbon disulfide; benzalkonium salts, organic (for RBC) hemolytic anemia. Acute cholineste nausea, vomiting, diarrhea, abdominal cramp constricted pupils, blurred vision, tightness in extreme cases, unconsciousness, convulsion occur. Product may cause slight but tempora skin. Direct contact with eyes may cause tem	eexisting skin or respiratory of is product. Preexisting condit o cholinesterase depression. matomyositis; existing toxicit; mercury compounds, ciguat erase depression may be evic os, excessive sweating, saliva- chest, weakness, muscle two is, severe respiratory depression ry irritation to the eyes and m	ions which lower these include: (for y from exposure to oxins or solanines; a denced by headache tion and tearing, itching and confusio sion and death may
Indication of immediate medical attention and special treatment needed	This product is an Organophosphate (OP) Inst following protective equipment in place: chem Remove contaminated clothing and do not re water. Dispose of heavily contaminated clothin wait for laboratory confirmation to treat patien USA and other countries, contact your local of Establish airway and oxygenation. IV Atroping parasympathetic nervous stimulation. If there Sulfate should be injected at 10 minutes inter atropinization has occurred. Pralidoxime chlo effective antidote in addition to and while mai 1 gram of 2-PAM should be injected, preferate minute period. If this is not practical, 2-PAM r as a 5% solution in water over not less than 2 gram of 2-PAM will be indicated if muscle we children, the dose of 2-PAM is 0.25 grams. A reserpine, furosemide and ethacrynic acid. C administration may be necessary. Observe p to cholinesterase inhibitors may without warn any cholinesterase inhibitor. Allow no further has been attained as determined by a blood of If ingested, empty stomach; activated charco- victim is alert, Syrup of Ipecac (2 tablespoons indicated. If symptoms such as loss of gag re emesis, gastric lavage should be considered Keep victim under observation. Keep victim v	nical resistant gloves and apr use without thorough cleanin ing, including shoes, as a ha- nts with strong clinical evidence or national poison control cen e sulfate is the antidote of ch are signs of parasympatheti rvals in doses of 1 to 2 milligr ride (2-PAM chloride) may al ntaining full atropinization. In oly as an infusion, in 250 cc con nay be administered slowly be 2 minutes. 5. Fire-fighting measures			
Suitable extinguishing media	Water fog Foam Dry chemical powder Carb	on dioxide (CO2)	

Suitable extinguishing media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Firefighters should wear full protective clothing including self contained breathing apparatus.
Fire fighting equipment/instructions	Use water spray to cool unopened containers.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Prevent entry into waterways, sewer, basements or confined areas. Shovel up, sweep up or vacuum up the material and place in a container for salvage or disposal. Clean surface thoroughly to remove residual contamination. Decontaminate the area and equipment with dilute alkali or ammonia (less than 5%) and detergent.
	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground. Inform appropriate managerial or supervisory personnel of all environmental releases.
7. Handling and storage	

Precautions for safe handlingWear appropriate personal protective equipment. Do not taste or swallow. When using, do not eat,
drink or smoke. Provide adequate ventilation. Wash hands thoroughly after handling. Avoid
release to the environment. Observe good industrial hygiene practices.Conditions for safe storage,Store in original tightly closed container. Store away from incompatible materials (see Section 10

Conditions for safe storage, including any incompatibilities Store in original tightly closed container. Store away from incompation of the SDS). Keep away from food, drink and animal feedingstuffs.

8. Exposure controls/personal protection

Occupational exposure limits	No exposure limits noted for ingredient(s).	
Biological limit values	No biological exposure limits noted for the ingredient(s).	
Appropriate engineering controls	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.	
Individual protection measures, s	such as personal protective equipment	
Eye/face protection	If contact is likely, safety glasses with side shields are recommended.	
Skin protection		
Hand protection	Wear appropriate chemical resistant gloves. Nitrile gloves are recommended (minimum thickness 0.40 mm). Wash when contaminated. Dispose of gloves when contaminated inside, when perforated or when contamination outside cannot be removed. Always wash hands before eating, drinking, smoking or using the toilet.	
Other	Wear suitable protective clothing. Long-sleeved shirt and long pants or coveralls, socks and closed toe shoes are required.	
Respiratory protection	If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.	
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.	
General hygiene considerations	Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.	

9. Physical and chemical properties

	Physical state	Solid.
	Form	Pellets.
	Color	White.
Ode	or	Strong cabbage-like odor
Ode	or threshold	Not available.
рΗ		Not available.
Mel	Iting point/freezing point	188.42 °F (86.9 °C) estimated
Init ran	ial boiling point and boiling ge	Not available.
Fla	sh point	Not available.
Eva	aporation rate	Not available.
Fla	mmability (solid, gas)	Not available.
Upp	per/lower flammability or exp	losive limits
	Flammability limit - lower (%)	Not available.
	Flammability limit - upper (%)	Not available.
	Explosive limit - lower (%)	Not available.
	Explosive limit - upper (%)	Not available.
Vap	oor pressure	1.70E-06 mm Hg estimated
Vap	oor density	Not available.
Rel	ative density	Not available.
Sol	lubility(ies)	
	Solubility (water)	Not available.
Aut	to-ignition temperature	Not available.
Dec	composition temperature	Not available.
Vis	cosity	Not available.
Oth	ner information	
	Bulk density	27 lb/ft ³

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Strong oxidizing agents and alkaline compounds.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	Emits hazardous fumes and smoke of unknown composition when heated to decomposition or burned.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Direct contact with eyes may cause temporary irritation.
Ingestion	Harmful if swallowed.
Symptoms related to the physical, chemical and toxicological characteristics	Direct contact with eyes may cause temporary irritation.

Information on toxicological effects

Acute toxicity

Harmful if swallowed.

12. Ecological information		
Ecotoxicity Toxic to a	uatic life with long lasting effects.	
Components	Species	Test Results
Acephate (O,S-Dimethylacetylphosphorar	nidothioate) (CAS 30560-19-1)	
Aquatic		
Crustacea EC50	Water flea (Daphnia magna)	> 50 mg/l, 48 hours
Fish LC50	Rainbow trout, donaldson trout	2.36 - 3 mg/l, 96 hours

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)	
Acephate (O,S-Dimethylacetylphosphoramidothioate)	-0.85

Mobility in soil	No data available.
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal methods/information).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

Not regulated as dangerous goods.

ΙΑΤΑ

Not regulated as dangerous goods.

IMDG

Not regulated as dangerous goods.

Transport in bulk according to
Annex II of MARPOL 73/78 and
the IBC CodeNot applicable.General informationNot regulated b
chronic 2 pollut

Not regulated by IMDG as a marine pollutant because it does not meet the criteria for listing as a chronic 2 pollutant, which requires a log Kow \ge 4.

15. Regulatory information

US federal regulationsThis product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication
Standard, 29 CFR 1910.1200.
This product is registered under EPA/FIFRA Regulations. It is a violation of Federal Law to use this
product in any manner inconsistent with its labeling. Read and follow all label directions. This
product is excluded from listing requirements under EPA/TSCA.
This is a pesticide product registered by the United States Environmental Protection Agency and is
subject to certain labeling requirements under federal pesticide law. These requirements differ
from the classification criteria and hazard information required for safety data sheets (SDS), and
for workplace labels of non-pesticide chemicals. The hazard information required on the pesticide
label is reproduced below. The pesticide label also includes other important information, including
directions for use.HAZARD TO HUMANS AND DOMESTIC ANIMALS.

CAUTION! Harmful if swallowed.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. This product and its degradate are highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.
